	RHUS COTINUS ROYAL PURPLE					
	(New dark purple-red leaf Smokebush)					
	There are several varieties of Purple Smokebush although Royal Purple is considered the very best. A number of varieties of Smokebush have been tried out in the nursery with Royal Purple always turning out to be the most outstanding. I am convinced of this to the extent that it is the only one now being propagated in the nursery. Royal Purple keeps its rich dark purple reddish colored foliage from Spring to late Fall. In late summer the matured leaves show a mottled edge which is a light red edge around the dark purple leaf. It is an outstanding plant in that it draws the attention of all who visit the nursery and is greatly admired for its brilliant foliage. The foliage is darker than any red Japanese Maple. The plant is adaptable for use as a lawn specimen especially in locations where the Japanese Maple is not hardy. Royal Purple is the only purple Smokebush to receive a Certificate of Merit from the Royal Horticultural Society. The branches make an excellent filler for bouquets especially with Chrysanthemums.

## VIBURNUM CARLESI COMPACTA

This plant was discovered several years ago in the nursery in a block of *Viburnum carlesi*. It is slower growing and has distinct dark green shiny leaves. It grows into a very compact plant and for this reason is called *Compacta*, ideal for use in foundation plantings. It buds up very heavily when a matured plant. The size, color and fragrance of the flowers are exactly like those of *Viburnum carlesi*. This plant is a distinct novelty of which a limited quantity is offered for the first time this year.

	Per 100 Each	Per 1000 Each
Strong, 2-year grafts .....	<del>\$1.50</del> \$1.25	<del>\$1.25</del> \$1.00

## HYDRANGEA PETIOLARIS

(Climbing Hydrangea) →

An attractive vine which does equally well in shade or sun. Its foliage is bold, clean and shrub-like and a rich dark green color. Short spur branches are topped with white, fragrant, *Hydrangea*-like blooms during the summer and lasts for a considerable period. Climbing *Hydrangea* is one of the finest and choicest vines grown. It clings by rootlets to walls and trees without support and can be planted against rocks for a cover.
